# worksite signage and equipment

## building wraps

Perfect for renovations, Britten's Architectural Mesh and Scaffolding Mesh murals can provide a printed

facade to hide scaffolding, buildings under renovation, and protect workers – while also providing building occupants a clear, unobstructed view down to the streets.

## boxpop®

From empty lot to the talk of the town. BoxPop® is at the forefront of an innovative movement in restrooms, property development,

modular construction, and real estate. By delivering turnkey builds that are ready to buy or lease, BoxPop® customized shipping containers are helping developers all across America realize big new profits from underutilized space.

## fence graphics

Fences transformed with FenceScrim™ deliver crowd-stopping branding real estate that generates hype, gets

the public rooting for your development project while keeping prying eyes and unauthorized personnel out.

## modular temporary walls

Sometimes you need some space—create your own with modular temporary walls.

Lightweight, intuitive, and efficiently assembled (or disassembled) without specialized tools, our modular wall system is made to respond to an evolving development site, retail environment, business model, or changing workspace.

## osha steps

Sturdy and simple to implement, OSHA steps are the optimum choice for construction site safety. Made with approved steel

construction and available in standard 2-step or 3-step configuration in either 36" or 60" heights, these steps are integral to workplace safety.

## custom metal fabrication

Whether you're starting an entire job from a sketch, are in need of a single part, or are

looking to repair or update an existing project, our custom metal fabrication team is equipped to help you every step of the way.
