

# Infinity™ Standee

## FABRIC PRINT INSTALLATION INSTRUCTIONS

- Lay the frame on floor to install fabric panels (this is not necessary, but often helps).
- Install the BOTTOM SECTION of the silicone edging first.
- Install the top section second.
- Install the sides third.
- If needed, a typical credit card will help with the edges. Begin by inserting the rubber silicon edging into the channel edge of the Infinity frame. Start at the center of each side and work to the corners. The print is fabric and designed to stretch for best presentation.
- Once all (4) sides of the fabric print have been installed into the channel, smooth out the fabric along each side.

### TIPS & TRICKS:

- Please follow installation instructions in the order they are given for the most successful presentation.
- If you are still having trouble fitting your banner, please make sure all corners of the frame are still screwed together tightly.
- Please note that each banner has been installed in a frame in our production facility before shipping to ensure correct fit.
- If removing the frame from the base, leave the frame intact for easy storage. Remember to keep hardware with the frame.
